

CROSS REFERENCE GUIDE

of EQUIVALENT PRODUCT CATALOG NUMBERS and COMPRESSION TOOLING CHARTS

This comparative listing has been checked for accuracy. We cannot, however, accept responsibility for changes, errors or omission. In some instances, the items are not exactly equal, however, in our opinion, they are similar and can be used for the same purpose.

Other stud sizes (holes) may be ordered in addition to those shown. Use the following suffix (s) after the catalog number to indicate proper size holes - always use stud size (not actual dimension of hole in pad):
i.e. - stud size 1/4" = MRB 500-4

1/4" = -4

5/16" = -5

3/8" = -6

1/2" = -8

5/8" = -9

Suffix N designates NEMA drilling - 1-3/4" center to center spacing of holes.

Equivalent Catalog Numbers ILSCO to MAC

[illegible]The logo for the Mountain Area Group (MAG) is located in the bottom right corner. It consists of the letters "MAG" in a bold, stylized font. The letters are composed of horizontal bars of varying lengths, creating a blocky, architectural appearance. The "M" and "A" are connected, and the "G" is separate. The entire logo is in a dark color, likely black or dark blue.
